## SKILLS

### PROGRAMMING
Python • Javascript • C• C++
Dart • Java
React JS • Django • CSS • MySQL

## ABOUT ME

I am a computer science undergraduate focusing on engineering who is interested in AI and machine learning. I also design websites and mobile applications. I also do well in my academics, keep up with new technologies, and concentrate on improving my soft skills in addition to these qualities.

## EXPERIENCE

### MACHINE LEARNING INTERN  | 2023
Machine Learning Intern under Dr.Usha rani (Principal consultant , LEAP team , IITM Incubation Cell )

### TREASURER OF IEEE SB GECI  | 2023
I Currently serve as the treasurer of IEEE SB GECI.I was selected for this position due to my previous experience in the IEEE

### JOINT SECRETARY OF IEEE SB GECI  | 2022-23
I served as Joint Secretary for IEEE SB GECI and volunteered for more than seven events with both online and offline events

## PROJECTS

### PERSONAL PORTFOLIO
Using ReactJS and Tailwind CSS, create a responsive personal portfolio

### IMAGE RESIZER
I built an image resizer for TinkerHub Co-Coder Event using Python for resizing images

### BLOG APP
The purpose of this project is to build a blog application using the Django framework, where users are able to create accounts, update and delete posts, as well as change their password through email and select posts of a specific user.
